

CONNECT Group Study Guide: Receiving The Vision; Living With Purpose.

There are many philosophies and ideologies in the world today that can easily confuse us. Even in Christendom, there are many denominations based on doctrinal differences and it can be quite difficult to know which doctrine is correct and which church you are to be a part of.

It is important that we live with the knowledge of the Holy One; it is important that we walk in His ways and it is important that we have a vision of the life He intends for us to have now and also in the days to come. Without Godly guidance one can suffer shipwreck in life; without a God given vision one can pursue a course in life contrary to what God intends for him/her to take.

I encourage you to take the next few days to reflect on where you are in life and ask God to reveal to you whether you are walking in His counsel and direction or not. I pray that you seek His counsel on the part you are meant to play in helping His church live its Kingdom purposes.
