I BELIEVE THEREFORE I AM

René Descartes, who was a French philosopher, coined the phrase; I think therefore I am. He said that what distinguished living things from non-living things is our ability to think.

I think therefore I am, I believe that Descartes didn't realize the profoundness of his statement. Thinking may distinguish human beings but it also has a way of shaping human beings.

In other words, you can become what you think of yourself.

I pray that you will begin to see yourself through Divine eyes and describe yourself with the words of God.
